

Notes From The e-Cigarette Manufacturer

November 10th, 2007

Electronic cigarettes are a brand new product for your health care. It lets you enjoy and satisfy those tactile taste sensations without any risk and dependence on tobacco. It gives you the same feeling of a tobacco cigar without suffering any tar smoking damages.

E-cigarettes are made from microelectronic control and supercritical atomizing technologies. It looks like a cigar, however there is no tar. It does smoke, however there is no smoking pollution material. You do not need any ignition and fire for smoking it, however it lets you enjoy and satisfy those tactile taste sensations without any risk and dependence on tobacco. It gives you the same feeling of a tobacco cigar or cigarette without suffering any tar smoking damages. Actually, you can smoke healthily without any environmental pollution.

Electronic cigarettes consists of a stainless steel shell, lithium ion battery, micro-electronic circuit, atomizing chamber, and indicator light at the head of the E-cig. It can make smokers enjoy the same pleasure as that of traditional cigar when inhaling the nicotine smog droplet, imitating the whole process of smoking. E-cig creates a healthy smoking cultural atmosphere, and has been eulogized by authoritative experts as the perfect combination of modern micro-electronic technology, biological technology and the conception of healthy life.

To quit tobacco and nicotine smoking, the E-cig can be used with the four basic tastes such as the high, medium, low and zero nicotine thickness cartridges to meet the requirements of different smokers. The following four steps are designed especially for smokers who are willing to quit reduce their nicotine reduction unconsciously by decreasing the inhaled nicotine volume:

Procedure:

- 1) Starting with high nicotine density cartridge following normal smoking habit
- 2) Then switch to medium nicotine density cartridge following normal smoking habit
- 3) Then alternate between the low nicotine density cartridge and the non-nicotine Thickness cartridge
- 4) Finally, quit smoking by using the non-nicotine cartridge, you will quit the nicotine reduction unconsciously and completely
